Exception Error Guides

We understand your day-to-day challenges; this is why we want to try to make your business life easier. We have prepared this guide to help you work more smartly and efficiently, giving you more time to do what you do best - grow your business.

This guide details the exceptions you may encounter on the IRP5 / IT3 (a) Exception Report and provides solutions on how to clear the exceptions.

Should you require further assistance you can contact our

Telephonic Support: +27(0) 10 203 4300\ 086 172 6657. E-mail us at support@Easybiztech.co.za

Please ensure that you are on our latest version: <https://easybiztech.co.za/product/quick-payroll-software/>.

Common Exceptions

Certificates cannot be created or exported to e@syFile until these exceptions are resolved

EXCEPTION:

Some of your transactions have not been specified as either Retirement Funding Income or Non Retirement Funding income (3698+3697 not equal to 3699, check calculation total 10, 11 and 12)

FIX:

1. Make a backup before proceeding.
2. Ensure that there are no processed employees, if you have processed employees you will need to do a clear run flags
3. Click on View, Statutory Reports, IRP5/IT3a Exception Report
4. On the filter screen filter for all of your employees (everyone to appear on the Right hand side).
5. Click on the 'Print to' drop down and select Scree, click on the 'Print Status' drop down and select Both.
6. The exception will still display on the Exception report, close the report. After closing the report a message will come up The IRP5/IT3a Exception report has detected that some of your transactions have not been specified for either RFI or NRFI for some employees. Do you wish to specify them now? Click yes, a list of transactions will be displayed specify them as either Retirement Funding Income or Non Retirement funding income and save the changes
Note: Quick Payroll cannot advise you what codes you need to specify for Retirement Funding income, you will need to contact your retirement fund for that break down. If the Company and its employees does not have any Pension, Provident and Retirement annuity you could select Non Retirement Funding income.

Tax Total 4116 has a value but no 4005 exists. This exception has been caused if you have been processing medical aid tax credits for an employee with no medical aid captured on the Payslip. This is usually due to code 8000 being overwritten to calculate an amount where the Medical Aid hasn't been processed.

1. Click on Process, Payslips
2. Click the Magnifying glass and select the employee that you are getting this exception for.
3. Check the default tab to see if code 8000 and/or 8002 have been processed. If it has been processed, then you will have to add in the correct medical aid transactions that is applicable to your employee.
4. If the codes have been processed incorrectly and this employee doesn't have Medical aid these codes will have to be removed from the payslip. Click on the deductions tab. Click on the code 8000. Make the period value for 8000 a zero. Make a note of the YTD value. Process a negative YTD (year to date) of code 8000 under period amount.
Note: If the initial amount processed on the code 8000 was a negative, you will have to process the corrective value as a positive. If this person is terminated a data fix can be done to correct this exception at a chargeable fee.

Tax Total 4582 is checked therefore 4497 must also be checked. This exception should not appear in the current tax year

1. If you are in the current tax year, update to the latest version of Quick Payroll. For assistance with updating, please refer to this guide.
2. Make a backup
3. Run a legislative release (If you have already done the Payroll run for your employees and paid them, we advise that you run the legislative release in the next period).

Specify a valid IT3(a) Reason Code on the Tax tab of the employee Masterfile screen. The reason you are getting this exception is due to fact that there hasn't been a reason specified as to why some of your employees aren't paying tax.

1. Make a backup before proceeding.
2. Ensure that there are no processed employees, if you have processed employees you will need to do a clear run flags
3. Click on View, Statutory Reports, IRP5/IT3a Exception Report
4. On the filter screen filter for all of your employees (everyone to appear on the Right hand side).
5. Click on the Print To drop down and select Screen, click on the Print Status drop down and select Both.
6. A Message 'The IRP5/IT3a Exception report has detected that IT3a Reason Codes have not been specified for some employees. Do you wish to specify them now?' Will come up.
7. Click on yes, select the reason why these employees aren't paying PAYE (eg. Income below threshold) and save the changes.

Note: The above mentioned procedure is the easiest procedure to follow, you can alternatively also navigate to Edit, Employee Masterfile. Click on the Tax tab and select the IT3a Reason code from the drop down list.

Exception: If code 3901, 3951, 3921 or 3922 has a value then tax total 4115 should have a value

This exception occurs due to two main reasons. Either you have processed one of the below transaction codes without adding the Tax Directive number to the employees masterfile OR you have processed the code 8004 mistakenly without having one of the transactions on the payslip. The transactions referred to are: 5780, 5830, 5850, 5890, 5910, 5915

Transactions Processed without entering tax directive Number:

Click on Edit, Employee Masterfile.

Click on the Tax Tab.

Ensure that a directive number is added in the Directive number field, if it is not please add it and save the masterfile.

If you do not have a directive number for the employee, you will need to contact SARS to obtain one.

Transaction 8004 mistakenly processed:

If you didn't process any of the above mentioned transactions, then you most probably processed the code 8004 mistakenly.

Print a Monthly Analysis report by clicking on View, Payroll Reports, Monthly Analysis.

Filter the report to show only the employee in question and ensure to run the report from the beginning of the tax year to the current period.

This report will show you in which period you mistakenly processed the code 8004 in. If this employee is still active, then you can correct this by doing a counter transaction for the code 8004.

Navigate to Process, Payslips...Click on the deductions tab.

In the first available white line, add in the code 8004.

Check the YTD amount column for code 8004 and make a note of the amount.

Now enter a negative value of the YTD in the period amount column.

Add the code 8005 into the first available white line and process the same amount that you processed on 8004, but as a positive. Ensure that the YTD value for transaction 8004 is currently set to zero.

EXAMPLE: You mistakenly processed code 8004 in a previous period. Transaction 8004 now has a YTD value (Year To date Value) of R4500. To do the correction you will process code 8004 with a value of -R4500 (negative value) ensuring that the YTD value will become a Zero. You will then process code 8005 with an amount of R4500 (positive). Doing the corrective will increase your PAYE amount for this period, so please speak to your tax practitioner for assistance in applying the correction.

NOTE: If the employee is no longer active then you have three options.

Either Restore the backup to the last period the employee was active then do the corrective transaction. You will have to recapture all the periods in between. Exclude this employee from your Electronic certificates, and do a manual certificate for the employee in E@syfile (we however can't assist with this).

How to clear exception stating Tax Total 3697 has a negative value. This exception states that there are transactions linked to the calculation total "Retirement Funding Income" with negative amounts where the cumulative negative total for these transactions exceeds the cumulative positive total of the transactions with positive amounts linked to this calculation total.

1. Click on View, Payroll Reports, Monthly Analysis
 2. Filter the report to show only the employee in question
 3. Ensure to run the report from the beginning of the tax year to the current period.
 1. Click ok to print the report. In the Income section, you will see a code that has been processed as a negative (in most cases it will be the code 5025, 5018 or 5014). Also, make a note of what transaction you are making use of to process the employee's salary (code 5000, 5002, 5001). Once you have taken down the salary transaction and the negative income transaction you can close the Monthly analysis.
 4. Click on Setup, Transaction. Click on the Magnifying glass and select the code that is used as the Basic Salary (eg. Code 5000, 5002, 5001). Click on the Calculation Total Button. Scroll down and you will note that this code has been selected as Non Retirement Funding Income. Click Ok on the Calculation Total screen.
 5. Click on the Magnifying glass again and this time search for the negative income code (Code 5025, 5018, 5014). Select this transaction. Click on the Calculation Total Button. Scroll down and you will see that this code is specified for Retirement Funding Income. Unselect Retirement Funding Income and select Non-Retirement Funding Income (If you cannot select or deselect the fields you have processed employees that first needs to be clear run flagged). Click Ok on the Calculation Total screen and close Setup Transactions
-

How to clear exception stating Tax Total 3698 has a negative value. This exception states that there are transactions linked to the calculation total “Non Retirement Funding Income” with negative amounts where the cumulative negative total for these transactions exceeds the cumulative positive total of the transactions with positive amounts linked to this calculation total.

1. Click on View, Payroll Reports, Monthly Analysis
2. Filter the report to show only the employee in question
3. Ensure to run the report from the beginning of the tax year to the current period. Click ok to print the report. In the Income section, you will see a code that has been processed as a negative (in most cases it will be the code 5025, 5018 or 5014). Also, make a note of what transaction you are making use of to process the employee’s salary (code 5000, 5002, and 5001). Once you have taken down the salary transaction and the negative income transaction you can close the Monthly analysis.

4. Click on Setup, Transaction. Click on the Magnifying glass and select the code that is used as the Basic Salary (e.g. Code 5000, 5002, 5001). Click on the Calculation Total Button. Scroll down and you will note that this code has been selected as Retirement Funding Income. Click Ok on the Calculation Total screen.

5. Click on the Magnifying glass again and this time search for the negative income code (Code 5025, 5018, 5014). Select this transaction. Click on the Calculation Total Button. Scroll down and you will see that this code is specified for Non Retirement Funding Income. Unselect Non Retirement Funding Income and select Retirement Funding Income (If you cannot select or deselect the fields you have processed employees that first needs to be clear run flagged). Click Ok on the Calculation Total screen and close Setup Transactions

Note: A progress indicator will run through. If this does not clear the exception, your employee probably has a RFI profile. If this is the case, you will have to add the negative income code to your RFI profile with the same percentage as your Basic Salary

Note: A progress indicator will run through. If this does not clear the exception, your employee probably has a RFI profile. If this is the case, you will have to add the negative income code to your RFI profile with the same percentage as your Basic Salary

Tax Total 4472 has a value but 3817 & 4001 do not have values

If you are doing your Bi-Annuals or Year End submission when you get this error/exception you will need to Restore back to the last period for that reporting phase. The last period will be August (Bi-Annuals) or February (Year End) to do this correction. If you restore you will need to then recapture all of the months between the month you are restoring to and the one you are currently in. If you do not wish to recapture, then you can have a chargeable data fix done.

Click on Process, Payslips.

Navigate to the employee in questions payslip. Make sure there is either an employee deduction or Company contribution in regards to the Pension fund on the payslip (This is dependent on the Employee’s structure and agreement with the fund). The codes that could be used: 9000 9002 9003 9001.

The Code 6410 should also be processed. If the code 6410 does not populate with a value, please check the Setup of the funds tab on this employees Edit, Employee Masterfile screen.

NOTE: It is important to note that 6410 won’t automatically back calculate. If you are only adding in this code in the August/February period, but you have been using it from the March period, you will have to override the amount on the benefits tab and calculate what the value should be in order to take in all of the months from March up to the current period.

Negative Tax Totals Detected – 4102 (PAYE). This exception states that your PAYE Year to date is a negative, however the YTD displays' as a zero on your Payslips.

1. Make a backup before proceeding.
2. Ensure that there are no processed employees, if you have processed employees you will need to do a clear run flags
3. Click on Process, Payslips
4. Click on the Magnifying glass and select the specific employee mentioned on the exception report for negative tax totals detected 4102 (PAYE).
5. On the default tab, please delete the transaction code 8000 and 8001 by highlighting the transaction and select the second icon on the top, delete line. You will receive a notification message; "Do you want to delete this transaction line?"
6. Select Yes. Another notification message will appear. Do you want the changes to this transaction line to affect the current period's payslip? Select Yes.
7. Save the payslip changes by selecting the save icon and then close the Process Payslips screen.
8. Click on File, Legislative Release. Continue with the assistant by clicking Next, Next again, Process, Yes, Ok, Cancel, Finish. Once complete, your screen will be blank.
9. Click on Process, Payslips, Select the specific employee. On the Default tab, below the last transaction code, please add back the code 8000 and 8001. You will receive a notification message; "Do you want the changes to this transaction line to affect the current period's payslip?" Select Yes.

A Payroll Run Exception states that your Retirement Fund Contribution exceeds the prescribed limits. You received a Payroll Run Exception Report which states that your Pension Fund, Provident Fund and/or Retirement Annuity Total Contribution exceeds the SARS prescribed limits of R 350 000 per annum or 27.5% of Remuneration.

Should you receive the above exception, you are advised to enter transaction code 6412 - Retirement Fund Monetary Cap. You will go to Process, Payslips and select the Default tab. Enter the transaction 6412 - Retirement Fund Monetary Cap and the calculation will automatically calculate the pro-rata amount that exceeds the Tax Deductible Deduction Allowance. The value that is calculated will be added to the Total Taxable Remuneration, in order to ensure that the correct Tax is applicable for this Retirement Fund.

How to add tax reference numbers. As from 1 March 2011 every employed person in South Africa must be registered as a Tax Payer regardless if they pay PAYE or not, or if they are South African or Foreign.

If an employee is already has a tax reference number the employer can obtain the tax number from the employee. Alternatively, the employer may register the employee on both the E@syfile software and efilng website or at any SARS office.

1. To capture an employee's tax reference number:

1. Click on Edit, Employee Masterfiles. Once on the employee Masterfile screen, the search icon can be used to locate the desired employees Masterfile.
2. On the employees Masterfile select the Tax tab. The employees tax reference number must be captured into the Tax Number field.
3. Click the Save icon at the top of the Masterfile to complete the process.

This exception is only a warning and will still allow you to complete your Year End process without having added your employee's tax reference numbers. It will at no point stop you from processing your Year End, or from generating your IPR5/IT3a Export File. You will also be able to import into the E@syfile software without the Tax Reference number and continue your submission. However, the employer might be penalised by SARS if a submission was done where tax reference numbers are missing. For any queries regarding Tax Reference numbers contact SARS on 0800 00 7277.

Income Received for code 3703 may not be reflected on IRP5 / IT3A together with 3703 or 3701. Reimbursive travel Non Taxable (Transaction 5540) cannot be processed on the same employee that has Reimbursive travel taxed on assessment (Transaction 5520). A corrective transaction must be processed before printing the final payslip in February of that tax year.

1. Navigate to the income tab of the employee's payslip (Process, Payslips, click on the magnifying glass and select the employee), make the period value for code 5540 '0' and make a note of the value in the YTD column, then process the Year to Date value you just noted as a negative amount in the period amount field which would then in turn change the Year to Date value to '0',

2. You will now add 5520 to the income tab of the employee's payslip (click on the first available white line on the income tab and type in 5520) and capture the value that was reversed in the above step on this transaction as a positive.

Example:

The code 5540 has an amount of R200 in the period amount on the income tab and an amount of R1500 in the YTD tab. Make the period amount a 0 and your YTD would have changed to R1300. You will now capture an amount of -R1300 (Negative R1300) in the period value tab that will change your YTD to 0. You will now add the code 5520 to the income tab and process the amount or R1300 in the period value.

Note: If this person is to receive Reimbursive Travel in this period, you will have to add it to the amount on 5520.

Tax total 4116 has a negative value. This exception occurs when transaction 8000 has been processed with a positive value. This is due to code 8000 been overwritten or the code has not updated

1. Click Process Payslip,
 2. Click on magnifying glass to select employee receiving exception
 3. Check on Default tab if code 8000 is overwritten. If it is, a corrective transaction can be processed
 4. If transaction code 8000 has not been overwritten then make a backup, Click Utility, Click Rebuilt Totals, Filter the employee and Click Rebuilt and Click close
 5. Then run a legislative release from the File menu
- Note: If employee has been terminated a data fix can be done, alternatively you can restore to a period when code 8000 was processed and reprocess from the period going forward

If Tax total 4473 has a value then tax totals 3825 and 4003 must also have values. This exception occurs most often because of the Provident Fund Fringe Benefit transaction (code 6411) being missing from the payslip.

1. Click on Process, Payslips.
 2. Navigate to the employee in questions payslip. Make sure there is either an employee deduction or Company contribution in regards to the Provident fund on the payslip (This is dependent on the Employee's structure and agreement with the fund). The codes that could be used:7040,7041,7042,7043,9004,9005,9006,9007
 3. The Code 6411 should also be processed. If the code 6411 does not populate with a value, please check the Setup of the funds tab on this employees Edit, Employee Masterfile screen.
- Note: It is also advised, that if this is not the first period in which provident fund is being processed for these employees, to print a fully detailed monthly analysis for the employees who receive the exception. On the monthly analysis, make sure all 3 codes are present in each month and that the values on them are correct. It is also imperative to this setup to make sure that you have correctly setup this employees Retirement Funding income.

If code 4474 has a value then code 3810 must have a value. When processing Medical aid that the company is contributing for on behalf of an employee, legislation states a Fringe Benefit arises from this and therefore the employee must pay PAYE on 100% of the amount that the company contributes. You will receive this exception (either as a Payroll Run Exception or a Statutory Exception) if you have processed 9090 Medical Aid Company Contribution without processing 6172 (or if 6172 has been overwritten to be a zero)

1. Click on Process, Payslips
 2. Check the default tab to see if code 9090 has been processed. If it has been processed, then you will have to add in the code 6172 to the default tab. If the code 6172 is on the payslip but is showing a different amount (or a Zero) undo the override and the amount will display as the same value that is on 9090.
- Note: If this isn't the first time you have processed a Medical aid for this employee, you will have to make sure to fix 9090 to be the same as 6172 by doing corrective transactions.

How to clear e@syfile error 4472 has a value, then 3817 and 4001 must also have a value. This exception occurs most often because of the Pension Fund Fringe Benefit transaction (code 6410) being missing from the payslip.

1. Click on Process, Payslips.
2. Navigate to the employee in questions payslip. Make sure there is either an employee deduction or Company contribution in regards to the Pension fund on the payslip (This is dependent on the Employee's structure and agreement with the fund). The codes that could be

used:7000,7001,7002,7003,9001,9002,9003,9004
3. The Code 6410 should also be processed. If the code 6410 does not populate with a value, please check the Setup of the funds tab on this employees Edit, Employee Masterfile screen.

Note: It is also advised, that if this is not the first period in which Pension fund is being processed for these employees, to print a fully detailed monthly analysis for the employees who receive the exception. On the monthly analysis, make sure all 3 codes are present in each month and that the values on them are correct. It is also imperative to this setup to make sure that you have correctly setup this employees Retirement Funding income.

Tax Total 4120 invalid for an employee younger than 65

Click on Process, Payslips.
Click on the magnifying class icon, Select the employee receiving the exception on.
In the Default tab check transaction 8008, should this transaction have been processed in the current period for the first time, then it can be deleted by clicking on code 8008 and click Delete line "second icon from the left side".
If there is a YTD amount, Take note of the value and if it has been processed as a negative or a positive value

If the YTD value was processed as a Positive, corrective transaction can be processed on the Deduction Tab with a negative of the YTD amount, for the YTD figure to show a zero value. If YTD was processed as Negative, then a positive value can be processed on a Deduction tab. The correction can be made in a current period before the employee is paid.

EXAMPLE: You have a Code 8008 on the Default tab, the Period amount is R200 and the YTD is R1500. Click on the deductions tab, change the period amount to R-1500. This will change the YTD amount to a zero and remove your exception

Exception: Tax Total 4472 has a value but 3817 & 4001 do not have values

If you are doing you're Bi-Annuals or Year End submission when you get this error/exception you will need to Restore back to the last period for that reporting phase. The last period will be August (Bi-Annuals) or February (Year End) to do this correction. If you restore you will need to then recapture all of the months between the month you are restoring to and the one you are currently in. If you do not wish to recapture, then you can have a chargeable data fix done.

Click on Process, Payslips.
Navigate to the employee in questions payslip. Make sure there is either an employee deduction or Company contribution in regards to the Pension fund on the payslip (This is dependent on the Employee's structure and agreement with the fund). The codes that could be used: 9000 9002 9003 9001.

The Code 6410 should also be processed.
If the code 6410 does not populate with a value, please check the Setup of the funds tab on this employees Edit, Employee Masterfile screen.
NOTE: It is important to note that 6410 won't automatically back calculate. If you are only adding in this code in the August/February period, but you have been using it from the March period, you will have to override the amount on the benefits tab and calculate what the value should be in order to take in all of the months from March up to the current period.

Tax Total 4582 is required if Tax Total 3701 has a value. Employee has a Travel Allowance transaction code 5501, or a custom Travel Allowance transaction that was created and processed on the payslip but no benefit transaction 6026 was processed or 6026 has been overwritten to have a zero value.

1. Run the Monthly Analyses report only for the specific employee by clicking on
 4. View, Payroll Reports, Monthly Analyses
 2. Filter for the employee that you are receiving the exception for to make sure they are displayed on the left
 3. In the print to drop down you can select Screen
 4. Leave the from transaction field empty
 5. Enter the ZZZZ in the too transaction field
 6. Number of months will be the number of Months from March to the current period you are in
 7. Confirm that a Travel allowance was process, but no benefit transaction 6026 was added to the payslip.
 8. If Transaction Code 5501 Travel allowance was processed, please go to Process...Payslips, add in Transaction Code 6026, and Save the payslip.
- Note: If you have processed 5501 for a number of months without processing the code 6026, we advise that you calculate the amount that needs to be processed on 6026 by taking all the previous values processed on 5501 into consideration. Every employee that has a travel allowance will have to submit their logbook information upon doing their individual return, and if the correct value wasn't processed on 6026 this employee might have to Pay in Tax after completing their individual return

Exception Report - Tax Total 4116 has a value but no 4005 exists

If you are doing your Bi-Annually or Year End submission when you get this error/exception you will need to Restore back to the last period for that reporting phase. The last period will be August (Bi-Annually) or February (Year End) to do this correction. If you restore you will need to then recapture all of the months between the month you are restoring to and the one you are currently in. If you do not wish to recapture, then you can have a chargeable data fix done.

Click on Process, Payslips

Click the Magnifying glass and select the employee that you are getting this exception for.

This can be fixed in one of 2 ways:

Add the medical aid codes to the payslip.

Check the default tab to see if code 8000 and/or 8002 have been processed. If it has been processed, then you will have to add in the correct medical aid transactions that is applicable to your employee. Depending on the medical aid structure you use your PAYE, UIF and SDL might change

Remove the incorrect codes from the payslip
If the codes have been processed incorrectly and this employee does not have Medical aid these codes will have to be removed from the payslip. Click on the deductions tab. Click on the code 8000. Click to override checkbox and make the period value for 8000 a zero. Make a note of the YTD (Year to Date) value. Process a negative YTD (year to date) of code 8000 under period amount. If the nett salary has already been paid to this employee you will have to counter the amount processed on code 8000 against code 8005. Changing the amount of 8000 will change the PAYE amount on your EMP201 and you will have to file for a correction.

NOTE: If the initial amount processed on the code 8000 was a negative, you will have to process the corrective value as a positive. If this person is terminated a data fix can be done to correct this exception at a chargeable fee.

Level 1 Exceptions

Certificates cannot be exported to e@syFile while Level 1 exceptions exist.

Free Format characters as specified by SARS:

These are A to Z upper and lower case, numbers 0 to 9, dash(-), back slash(\), forward slash(/), question mark(?), at sign(@), ampersand(&), dollar(\$), exclamation(!), hash(#), plus(+), equals(=), semi colon(;), colon(:), left and right brackets() and full stop.

Alphanumeric characters as specified by SARS

These are A to Z upper and lower case, dash, space and numbers 0 to 9.

EXCEPTION:

FIX:

Only Free Format characters as specified by SARS are allowed in Company Name .	Select Setup...Company Parameters and enter free format characters in the Company Name field.
Only Free Format characters as specified by SARS are allowed in Trade Name .	Select Setup...Company Parameters and enter free format characters in the Trade Name field.
Employer Physical Address Line 1 - Unit Number may only contain 8 characters Alphanumeric characters as specified by SARS.	Select Setup...Company Parameters and enter a Physical Address Unit Number that does not have more than 8 alphanumeric characters.

A Contact Person must be entered.	Select Setup...Company Parameters...Company...Company Information and enter the Contact Person's name.
Tax Total 4120 (Additional Medical Tax Credits) has a value so Nature of Person must be A, B, C, M, N or R.	Select Edit...Masterfile and correct the employee's nature of person on the Tax tab.
Specify a valid IT3(a) Reason Code on the Tax Tab on the Edit...Employee Masterfile screen. Reason Code 6 is invalid if transaction 5207 (Directors Remuneration for Next Tax Year) was not processed.	Select Edit...Masterfile and select a IT3(a) reason on the Tax tab for the employee.
The Employer SIC Code is mandatory.	Select Setup...Company Parameters...Statutory and select the applicable Standard Industry Classification Code.
A valid postal code must be specified on the Setup...Company Parameters screen.	Select Setup...Company Parameters and enter a valid Postal Code for the company address.

Level 2 Exceptions

Level 2 Exceptions must be corrected before processing the final payroll run in August. Employees with Level 2 Exceptions will be excluded from the CSV file exported for e@syFile.

EXCEPTION:	FIX:
Negative Tax Totals detected.	SARS will reject a tax certificate with negative totals for any certificate source code. A corrective transaction must be processed before printing the final payslip in August or the RFI setup must be checked.
The value of Tax Total 3813/3863(Medical Costs Paid by Company) must be greater than or equal to the value of Tax Total 4024 (Medical Costs Direct Family).	SARS will reject a tax certificate where Medical Costs Fringe Benefit value is not equal to the actual costs incurred on behalf of the employee. A corrective transaction must be processed before printing the final payslip in August.
Code 4005 (Medical Aid Contributions) is mandatory if a value for code 3810 (Medical Aid Benefit) exists.	SARS will reject a tax certificate where a Medical Aid Fringe Benefit was allowed without reporting the actual or deemed contribution made by the employee. A corrective transaction must be processed before printing the final payslip in August.

If Tax Total 4115 (PAYE - Retirement Lump Sum) has a value either on Tax Total 3901 (Gratuity - Retire/Retrench) or Tax Total 3915 (Pens/RAF after 1 Oct 2007) or Tax Total 3920 (Retirement fund 1 March 09) or Tax Total 3921 (Living Annuity & Surplus) or Tax Total 3922 (Death Lump Sum Payment) or Tax Total 3923 (Transf. Unclaimed Benefits) must have a value.

SARS will reject a tax certificate where tax on a lump sum has been processed, but the relevant lump sum have not been reported. A corrective transaction must be processed before printing the final payslip in August.

If Tax Total 3901 (Gratuity - Retire/ Retrench), Tax Total 3915 (Pens/RAF after 1 Oct 2007) , Tax Total 3920 (Retirement fund 1 March 09), Tax Total 3921 (Living Annuity & Surplus) or Tax Total 3922 (Death Lump Sum Payment) or 3923 (Transf. Unclaimed Benefits) have a value then Tax Total 4115 (PAYE - Retirement Lump Sum) must be processed and the Directive number must be specified

This exception occurs due to two main reasons. Either you have processed one of the below transaction codes without adding the Tax Directive number to the employees masterfile OR you have processes the code 8004 mistakenly without having one of the transactions on the payslip. The transactions referred to below are: 5780, 5830, 5850, 5890, 5910, 5915

If tax total 4475 (Retirement Annuity Contributions) has a value, then tax totals 3828 (Retirement Annuity Fringe Benefit) and 4006 (Retirement Annuity) must also have values.

SARS will reject a tax certificate where a Retirement Annuity contribution is made by the employer, but no fringe benefit code is reflected. A corrective transaction must be processed before printing the final payslip in August.

Code 4474 (Medical Aid Contributions) is mandatory if a value for code 3810 (Medical Aid Benefit) is specified.

SARS will reject a tax certificate where a Medical Aid Fringe Benefit was allowed without reporting the value contributed by the employer. A corrective transaction must be processed before printing the final payslip in August.

Tax Total 4102 (PAYE) cannot have a value if the Tax Method on the Tax Tab on Edit...Employee Masterfile is Exempt.

SARS will reject a tax certificate where an employee is exempt from paying employee's tax, but an amount PAYE was deducted. A corrective transaction must be processed before printing the final payslip in August or the employee's tax method must be changed.

Tax Total 4116 (Medical Tax Credits) has a negative value. Transaction 8000 must be processed as a negative.

SARS will reject a tax certificate where the employee has Medical Tax Credits with a negative value, but no value is reported against Med. Aid Tax Credit Applied. A corrective transaction must be processed before printing the final payslip in August.

Tax Total 4120 (Additional Medical Tax Credits) has a negative value. Transaction 8008 must be processed with a negative value.

SARS will reject a tax certificate where the employee has Additional Medical Tax Credits with a negative value, but no value is reported against Med. Aid Tax Credit Applied. A corrective transaction must be processed before printing the final payslip in August.

Code 4474(Medical Aid Contributions) must equal the value for code 3810 (Medical Aid Benefit).

SARS will reject a tax certificate where a Medical Aid Fringe Benefit value is not equal to the value contributed by the employer. A corrective transaction must be processed before printing the final payslip in August.

Tax Totals 3696 + 3699 must be equal to Income Sources

NOTE: In order to attempt any of the below resolutions, your employees will have to have a status of on Not Processed, so if your employees are processed you will have to do a clear run flags.

Check your Custom Templates:

The standard transactions in Quick Payroll have been pre-set with their own relevant tax totals, so they shouldn't be the cause of this exception. You will have to double check that all your custom templates have been setup for the correct Tax Totals.

Navigate to Setup, Transaction Templates.
Click on the magnifying glass:
Any code between 0030 and 5000 needs to be selected and checked (one by one)

Any code after 9404 needs to be checked (unless you have council codes, then any code that appears after your relevant M,I,E,R or S codes)
After you have selected your custom code, click on Tax Totals. Ensure that the correct tax totals were selected – please check with your Tax Practitioner what tax totals needs to be selected.
TIP: Usually tax totals for incomes will consist out of two codes. 3699 OR 3696 will be one of these codes. Both of these cannot be selected. In most cases you shouldn't have more than two tax totals of the same type on a transaction – please confirm with your tax practitioner for more information.

Rebuilding database entries:

We would advise that you make a backup, complete a Pay Period Update into the next period and then run a rebuild totals.

If Tax Total 4116(Medical Tax Credits) has a value then 4005(Medical Aid Contributions) must have a value.

SARS will reject a tax certificate where a Medical Aid Tax Credit has a value but there is no value for medical aid contributions. A corrective transaction must be processed before printing the final payslip in August.

Tax Total 4142 (SDL Contribution) has a value, but SDL Exempt is checked under Setup...Company Parameters.

SARS will reject a tax certificate where SDL Contributions were made but SDL Exempt is checked under Setup...Company Parameters. A corrective transaction must be processed before printing the final payslip in August or the option must be deselected.

Income received for code 3703 may not be reflected on the IRP5/IT3(a)certificate together with code 3701 and/or 3702 from the 2014 year of assessment. The value of code 3703 must be included in the value for code 3702.

SARS will reject a tax certificate where code 3703 appears with code 3701 and/or 3702. A corrective transaction must be processed before printing the final payslip in August.

The value for code 3703 has exceeded the maximum value allowed. The value of code 3703 must be moved to code 3702.

SARS will reject a tax certificate where the value for code 3703 exceeds the maximum value allowed. A corrective transaction must be processed before printing the final payslip in August.

Tax Total 4582 is required from 1 March 2016. Tax Total [TranCode] has a value so the associated benefit transaction must update Tax Total 4582. Run a Legislative Release to update the associated benefit transaction.

SARS requires the remuneration portion of travel to reflect on tax total 4582. Select tax total 4582 on the relevant benefit transaction.

Tax Total 4582 is required from 1 March 2016. Tax Total [TranCode] has a value, so the associated benefit transaction must update Tax Total 4582. Add a benefit transaction for the taxable portion of [TranCode] or alternatively link an existing one to Tax Total 4582.

SARS requires the remuneration portion of travel to reflect on tax total 4582. Select tax total 4582 on the relevant benefit transaction.

Transaction [TranCode] - Tax total 3828 RA Fringe Benefit has been checked, so Tax Total 4497 may not be checked.	Values reflected on tax total 3828 must not have influence on tax total 4497.
If employee is younger than 65 then Tax Totals 4120 (Additional Medical Tax Credits) may not have a value.	SARS will reject a tax certificate where code 4120 has a value, but the employee is younger than 65. A corrective transaction must be processed before printing the final payslip in August.
If Tax Total 4120 (Additional Medical Tax Credits) has a value then 4005 (Medical Aid Contributions) must have a value.	SARS will reject a tax certificate where code 4120 has a value, but code 4005 does not have a value. A corrective transaction must be processed before printing the final payslip in August.
If tax total 4473 (Provident Fund Contributions) has a value, then tax totals 3825 (Provident Fund Fringe Benefit) and 4003 (Provident Fund) must also have values.	SARS will reject a tax certificate where code 4473 has a value, but codes 3825 & 4003 does not have values. A corrective transaction must be processed before printing the final payslip in August.
If tax total 4472 (Pension Fund Contributions) has a value, then tax totals 3817 (Pension Fund Fringe Benefit) and 4001 (Pension Fund) must also have values.	SARS will reject a tax certificate where code 4472 has a value, but codes 3817 & 4001 does not have values. A corrective transaction must be processed before printing the final payslip in August.
Tax Total 4018 - Inc Replacement Policy is no longer valid. Uncheck Tax Total 4018 and Tax Total 4497 from transaction [Transaction Code].	SARS will reject a tax certificate where an Income Replacement Policy has a value reported on tax total 4018. Unselect the relevant transactions reflected in the Quick Payroll, to unlink them from the tax totals.
If Tax Total 3922 has a value then the Tax Directive Value must be processed against Tax Total 4115.	SARS will reject a tax certificate where code 3922 has a value, but code 4115 does not have values. A corrective transaction must be processed before printing the final payslip in August.

Level 3 Exceptions

Level 3 Exceptions can be corrected before processing the final payroll run in August. Employees with Level 3 Exceptions will be excluded from the CSV file exported for e@syFile.

EXCEPTION:

FIX:

Valid postal codes for the Residential Address must be specified on Edit...Employee Masterfile screen.	Go to Edit...Employee Masterfile and enter a valid postal code for the specific employee.
Residential Address: The Street/Name of Farm and either the Suburb/District field or City/Town must be specified.	Go to Edit...Employee Masterfile and enter a Street/Name of Farm and either the Suburb/District or City/Town for the specific employee on the Addresses tab on the Personal tab.

Residential and Postal Address must be specified on the Edit...Employee Masterfile screen.	Select Edit...Employee Masterfile...Personal...Addresses and enter the employee's Residential and Postal Addresses.

WARNING: Postal Address 2 may only contain 26 characters as specified by SARS if Postal Address is a Street. These are A to Z upper and lower case, dash, space and numbers 0 to 9.

Go to **Edit...Employee Masterfile** and enter the Postal Address 2 for the specific employee that does not have more than 26 free format characters.

WARNING: Postal Address 2 may only contain 22 characters as specified by SARS if Postal Address is a Private Bag. These are A to Z upper and lower case, dash, space and numbers 0 to 9.

Go to **Edit...Employee Masterfile** and enter the Postal Address 2 for the specific employee that does not have more than 22 free format characters.

WARNING: Postal Address 2 may only contain 8 characters as specified by SARS if Postal Address is a Postal Agency. These are A to Z upper and lower case, dash, space and numbers 0 to 9.

Go to **Edit...Employee Masterfile** and enter the Postal Address 2 for the specific employee that does not have more than 8 free format characters.

WARNING: Postal Address 2 may only contain 8 characters as specified by SARS if Postal Address is Other. These are A to Z upper and lower case, dash, space and numbers 0 to 9.

Go to **Edit...Employee Masterfile** and enter the Postal Address 2 for the specific employee that does not have more than 8 free format characters.

WARNING: Postal Address 3 may only contain 30 characters as specified by SARS if Postal Address is a PO Box. These are A to Z upper and lower case, dash, space and numbers 0 to 9.

Go to **Edit...Employee Masterfile** and enter the Postal Address 3 for the specific employee that does not have more than 30 free format characters.

WARNING: Postal Address 3 may only contain 30 characters as specified by SARS if Postal Address is a Street. These are A to Z upper and lower case, dash, space and numbers 0 to 9.

Go to **Edit...Employee Masterfile** and enter the Postal Address 3 for the specific employee that does not have more than 30 free format characters.

WARNING: Postal Address 3 may only contain 30 characters as specified by SARS if Postal Address is a Private Bag. These are A to Z upper and lower case, dash, space and numbers 0 to 9.

Go to **Edit...Employee Masterfile** and enter the Postal Address 3 for the specific employee that does not have more than 30 free format characters.

WARNING: Postal Address 3 may only contain 22 characters as specified by SARS if Postal Address is a Postal Agency. These are A to Z upper and lower case, dash, space and numbers 0 to 9.

Go to **Edit...Employee Masterfile** and enter the Postal Address 3 for the specific employee that does not have more than 22 free format characters.

WARNING: Postal Address 3 may only contain 22 characters as specified by SARS if Postal Address is a Other. These are A to Z upper and lower case, dash, space and numbers 0 to 9.

Go to **Edit...Employee Masterfile** and enter the Postal Address 3 for the specific employee that does not have more than 22 free format characters.

WARNING: Postal Address 4 may only contain 30 characters as specified by SARS if Postal Address is a PO Box. These are A to Z upper and lower case, dash, space and numbers 0 to 9.

Go to **Edit...Employee Masterfile** and enter the Postal Address 4 for the specific employee that does not have more than 30 free format characters.

WARNING: Postal Address 4 may only contain 21 characters as specified by SARS if Postal Address is a Street. These are A to Z upper and lower case, dash, space and numbers 0 to 9.

Go to **Edit...Employee Masterfile** and enter the Postal Address 4 for the specific employee that does not have more than 21 free format characters.

WARNING: Postal Address 4 may only contain 30 characters as specified by SARS if Postal Address is a Private Bag. These are A to Z upper and lower case, dash, space and numbers 0 to 9.

Go to **Edit...Employee Masterfile** and enter the Postal Address 4 for the specific employee that does not have more than 30 free format characters.

WARNING: Postal Address 4 may only contain 30 characters as specified by SARS if Postal Address is a Postal Agency. These are A to Z upper and lower case, dash, space and numbers 0 to 9.

Go to **Edit...Employee Masterfile** and enter the Postal Address 4 for the specific employee that does not have more than 30 free format characters.

WARNING: Postal Address 4 may only contain 9 characters as specified by SARS if Postal Address is a Other. These are A to Z upper and lower case, dash, space and numbers 0 to 9.

Go to **Edit...Employee Masterfile** and enter the Postal Address 4 for the specific employee that does not have more than 9 free format characters.

WARNING: The Residential Address Country Code has not been specified and will default to ZA.

Go to **Edit...Employee Masterfile** and change the Residential Address Country Code for the specific employee if ZA is not correct.

WARNING: The Postal Address Country Code has not been specified and will default to ZA.

Go to **Edit...Employee Masterfile** and change the Postal Address Country Code for the specific employee if ZA is not correct.

Business Address: The Street/Name of Farm and either the Suburb/District field or City/Town must be specified.

Go to **Edit...Employee Masterfile** and enter the Business Address Street/Name of Farm and either the Suburb/District or the City/Town for the specific employee.

Carriage Return Line Feed characters that exist on the employee postal or residential address must be removed on Edit...Employee Masterfile screen.	Go to Edit...Employee Masterfile and remove the Carriage Return Line Feed characters at the end of the postal or residential address fields for the specific employee.
Employee initials are blank. Make a change on Edit...Employee Masterfile screen and save the record.	Go to Edit...Employee Masterfile and change anything on the specific employee and save the record.
The Home Telephone Number must be numeric, cannot contain any spaces and must be at least 9 characters long.	Go to Edit...Employee Masterfile and enter a Home Telephone Number for the specific employee on the Contacts tab on the Personal tab that is numeric with no spaces and at least 9 characters long.
The Work Telephone Number must be numeric, cannot contain any spaces and must be between 9 and 11 characters long.	Go to Edit...Employee Masterfile and enter a Work Telephone Number for the specific employee on the Contacts tab on the Personal tab that is numeric with no spaces and between 9 and 11 characters long.
The Fax Number must be numeric, cannot contain any spaces and must be at least 9 characters long.	Go to Edit...Employee Masterfile and enter a Fax Number for the specific employee on the Contacts tab on the Personal tab that is numeric with no spaces and at least 9 characters long.
The Cell Phone Number must be numeric, cannot contain any spaces and must be at least 10 characters long.	Go to Edit...Employee Masterfile and enter a Cell Phone Number for the specific employee on the Contacts tab on the Personal tab that is numeric with no spaces and at least 10 characters long.
Work Telephone Number must be completed.	Go to Edit...Employee Masterfile and enter a Work Telephone Number for the specific employee on the Contacts tab on the Personal tab.
The E-mail Address specified is invalid.	Go to Edit...Employee Masterfile and enter a valid email address.
The Passport Number must be at least 6 characters long.	Go to Edit...Employee Masterfile and enter a Passport Number for the specific employee on the Details tab on the Personal tab that is at least 6 characters long.
The Passport number may not be longer than 18 characters.	Go to Edit...Employee Masterfile and enter a Passport Number for the specific employee on the Details tab on the Personal tab that is not longer than 18 characters.
The Passport Number may not contain spaces.	Go to Edit...Employee Masterfile and correct the passport number.
In order to have a passport number completed with country of issue ZAF, you need to have a valid South African ID number completed.	Go to Edit...Employee Masterfile and correct the country of issue, or enter a valid South African ID number.
Passport Country of Issue is mandatory if a Passport Number is selected.	Go to Edit...Employee Masterfile and enter a Passport Country of Issue for the specific employee on the Details tab on the Personal tab.
The Bank Account Number must be numeric and cannot be more than 16 characters.	Go to Edit...Employee Masterfile and enter a Bank Account Number for the specific employee on the Payment tab that is not longer than 16 characters.

Bank Account Type Other is not a valid Bank Account type.	Go to Edit...Employee Masterfile and select a valid Bank Account Type for the specific employee on the Payment tab.
All the fields on the Bank/Branch Code linked to this employee must be entered.	Go to Edit...Employee Masterfile and enter a Bank/Branch Code for the specific employee on the Payment tab.
The Bank/Branch Code must be numeric and cannot be more than 6 characters.	Go to Edit...Employee Masterfile and enter a Bank/Branch Code for the specific employee on the Payment tab that is numeric and not longer than 6 characters.
Employee's Tax Number must be specified on the Tax Tab on Edit...Employee Masterfile screen.	Go to Edit...Employee Masterfile and enter the correct Tax Number on the Tax tab for the specific employee.
Employee's Tax Number specified on the Tax Tab on Edit...Employee Masterfile screen is invalid. If nature of Person is A, B, D or K then the first character cannot be greater than 4.	Go to Edit...Employee Masterfile and enter the correct Tax Number on the Tax tab for the specific employee.
Employee's Tax Number specified on the Tax Tab on Edit...Employee Masterfile screen is invalid. If Nature of Person is N then the first character cannot be 9.	Go to Edit...Employee Masterfile and enter the correct Tax Number on the Tax tab for the specific employee.
Employee's Tax Number specified on the Tax Tab on Edit...Employee Masterfile screen is invalid. The Tax Number length cannot be more than 10 characters.	Go to Edit...Employee Masterfile and enter the correct Tax Number on the Tax tab for the specific employee.
Employee's Tax Number specified on the Tax Tab on Edit...Employee Masterfile screen is invalid.	Go to Edit...Employee Masterfile and enter the correct Tax Number on the Tax tab for the specific employee.
The employee SIC Code is mandatory.	Go to Edit...Employee Masterfile...Statutory...ETI and select the applicable Standard Industry Classification Code.
Employee's ID Number specified on the Personal Tab on Edit...Employee Masterfile screen is invalid.	Select Edit...Employee Masterfile and make sure that the ID Number of the specified employee is entered correctly. If you do not have an ID Number, enter the Passport Number in the Passport Number Field.
Employee's Date of Birth and ID Number do not match.	Select Edit...Employee Masterfile and correct the ID Number or Date of Birth on the Personal Tab for the specific employee. Ensure that the first 6 digits of the ID Number correspond with the Date of Birth.
Nature of Person must be specified on the Tax Tab on Edit...Employee Masterfile screen.	Select Edit...Employee Masterfile...Tax and select one of the following options from the Nature of Person field: A = Employee has a valid ID document or SA passport and the ID/passport Number was entered on the Personal tab of the Employee Masterfile. B = Employee does not have a valid ID document or SA passport and no ID/passport Number was entered on the Personal tab of the Employee Masterfile. C = Employee is a Director of a company or Member of a CC

D = Employee is not an individual but registered as a Trust.
E = Employee is not an individual but a Company or CC.
F = Employee is not an individual but trades as a Partnership.
G = Employee is not an individual but trades as a Corporation.
H = Employee is not an individual but a Personal Service Provider
M = Asylum Seeker
N = Pensioner
R = Refugee

Specify a valid IT3(a) Reason Code on the Tax Tab on Edit...Employee Masterfile screen.

When an employee does not pay tax, a valid IT3(a) Reason Code should be specified. Select **Edit...Employee Masterfile** and access the employee in question. Select the Tax tab. Select the reason why no employee's tax was deducted from the employee's earnings from the IT3(a) Reason Code field:

- 1 = Not a valid option after the 2003 Tax Year.
- 2 = Employee's annual earnings is less than the annual tax threshold.
- 3 = Employee is an Independent Contractor not deemed to be an employee.
- 4 = Employee received only non-taxable earnings for the current tax year.
- 5 = Employee received income from a source outside South Africa which was exempt from employees tax.
- 6 = Employee is a Director of a company or Member of a CC and received additional earnings only taxable in the next tax year.
- 7 = Employee is not an individual but a Labour Broker in possession of an IRP30 tax exemption certificate issued by SARS for the current tax year.
- 8 = No tax to be withheld due to Medical Scheme Fees Tax Credit allowed.
- 9 = Par 11A(5) Fourth Schedule notification - No withholding possible.

Note! Instead of setting each individual IT3(a) Reason Code on the Edit...Employee Masterfile screen, use the global IT3(a) Reason Code Setup screen that will be available after running the IRP5/IT3(a) Exceptions Report.

If Tax Total 4116(Medical Tax Credits) has a value but 4103(Total Employee's Tax) is zero, then the Employee IT3(a) Reason Code must be 8.

If an employee does not pay tax, but a value was calculated for Medical Tax Credits, the IT3(a) Reason Code should be 8. To correct this, select **Edit...Employee Masterfile** and select the correct option on the Tax tab.

Tax Total 4116 (Medical Tax Credits) has a value so Nature of Person must be A, B, C, M, N or R.

Select **Edit...Employee Masterfile** and access the employee in question. Select the Tax Tab. Select the Nature of Person option A, B, C, M, N or R.

Employee's ID or Passport Number must be specified on the Edit...Employee Masterfile screen.	If you do not have an ID Number or Passport Number for an employee, you have to select Edit...Employee Masterfile and select the Nature of Person on the Tax Tab as B – Individual without ID. Alternatively, enter the ID Number or Passport Number of the employee on the Personal tab.
Company/CC/Trust Number must be specified on the Tax Tab on Edit...Employee Masterfile screen.	If the Nature of Person is D or E you will need to enter the Company/CC/Trust Number by selecting Edit...Employee Masterfile and entering the Company/CC/Trust Number on the Tax tab.
Directive Number must be specified on the Tax Tab on Edit...Employee Masterfile screen.	If the Tax Method for an employee is Directive Percentage or Directive Amount and the NOP is A, B or N you are required to enter the Directive Number by selecting Edit...Employee Masterfile and entering the directive number on the Tax Tab.
WARNING: Type of employment for this employee must either be Permanent or Temporary.	Select Edit...Employee Masterfile and select a valid option on the Tax tab.
A directive number is mandatory if a payment is allocated to Tax Total 3608.	Select Edit...Employee Masterfile and access the employee in question. Select the Tax tab and enter the directive number.
A directive number is mandatory if a payment is allocated to Tax Total 3614.	Select Edit...Employee Masterfile and access the employee in question. Select the Tax tab and enter the directive number.
A directive number is mandatory if a payment is allocated to Tax Total 3707.	Select Edit...Employee Masterfile and access the employee in question. Select the Tax tab and enter the directive number.
A directive number is mandatory if a payment is allocated to Tax Total 3718.	Select Edit...Employee Masterfile and access the employee in question. Select the Tax tab and enter the directive number.
A directive number is mandatory if a payment is allocated to Tax Total 3901.	Select Edit...Employee Masterfile and access the employee in question. Select the Tax tab and enter the directive number.
A directive number is mandatory if a payment is allocated to Tax Total 3902.	Select Edit...Employee Masterfile and access the employee in question. Select the Tax tab and enter the directive number.
A directive number is mandatory if a payment is allocated to Tax Total 3903.	Select Edit...Employee Masterfile and access the employee in question. Select the Tax tab and enter the directive number.
A directive number is mandatory if a payment is allocated to Tax Total 3904.	Select Edit...Employee Masterfile and access the employee in question. Select the Tax tab and enter the directive number.
A directive number is mandatory if a payment is allocated to Tax Total 3905.	Select Edit...Employee Masterfile and access the employee in question. Select the Tax tab and enter the directive number.
A directive number is mandatory if a payment is allocated to Tax Total 3909.	Select Edit...Employee Masterfile and access the employee in question. Select the Tax tab and enter the directive number.
A directive number is mandatory if a payment is allocated to Tax Total 3915.	Select Edit...Employee Masterfile and access the employee in question. Select the Tax tab and enter the directive number.

A directive number is mandatory if a payment is allocated to Tax Total 3920.	Select Edit...Employee Masterfile and access the employee in question. Select the Tax tab and enter the directive number.
A directive number is mandatory if a payment is allocated to Tax Total 3921.	Select Edit...Employee Masterfile and access the employee in question. Select the Tax tab and enter the directive number.

Specify a valid IT3(a) Reason Code on the Tax Tab on Edit...Employee Masterfile screen. Reason Code 1 is invalid for the current tax year.	SARS will reject a tax certificate where IT3(a) reason code 1 is used after the 2003 tax year. Select Edit...Employee Masterfile and access the employee in question. Select the Tax tab. Select the reason why no employee's tax was deducted from the employee's earnings from the IT3(a) Reason Code field.
Please specify Retirement Funding Income or Non-Retirement Funding Income.	<p>Indicate whether the value of the transaction in question was used in the calculation of pension/provident fund contributions. Use any one of the following methods:</p> <p>Select Setup...Transactions. Select the transaction in question. Click on Calculation Totals and select the Retirement Funding Income option if pension/provident fund contributions were based on the value of this taxable income/benefit. Select the Non Retirement Funding Income option if pension/provident fund contributions were not calculated on the value of this taxable income/benefit.</p> <p>Select Setup...RFI Profiles. Enter a code and description for the pension/provident fund contributions that were processed. Select whether the contributions were calculated on a Percentage of Package or Percentage of Income. If calculated on a Percentage of Package, specify the percentage in the field provided. If calculated on a Percentage of Income, select each applicable taxable income and/or benefit transaction and specify the percentage of the value on which the pension/provident fund contribution was based. Select the employees tab and add the employees who are members of this specific pension/provident fund.</p>
Nature of Person should be "C" if the IT3(a) Reason Code is 6 on the Tax Tab on Edit...Employee Masterfile screen.	If the employee is a Director and the Nature of Person is specified as C – Director on the Tax tab of the Employee Masterfile, the IT3(a) Reason Code should be 6-Directors Remuneration. To correct this, select Edit...Employee Masterfile and select the correct options on the Tax tab.
Retirement Funding Income or Non-Retirement Funding Income should not be specified if not Gross Remuneration.	For the Transactions that are specified on the exception report, uncheck Retirement Funding Income or Non-Retirement Funding Income under Setup...Transactions...Calculation Totals .

Double or Single quotes used on the Employee Surname, Name or Address must be removed on Edit...Employee Masterfile screen.	Remove any '(Apostrophes) or "(Quotes) from the employee name, surname and address fields under Edit...Employee Masterfile on the Personal tab.
Numerics used on the employee name or surname must be removed on Edit...Employee Masterfile screen.	Remove any number from the employee name and surname under Edit...Employee Masterfile on the Personal tab.
Nature of person "B" must not have an ID Number or a Passport number entered.	Select Edit...Employee Masterfile and access the employee in question. Select the Tax Tab. Select the Nature of Person option A or C.
If Nature of person is M, then Alternate ID needs to be completed.	Select Edit...Employee Masterfile and access the employee in question. Enter a valid Alternate ID Number.
Nature of Person N must have an ID Number or Passport Number entered.	Select Edit...Employee Masterfile and access the employee in question. Enter a valid ID Number or Passport Number.
Tax Total 3615 (Director's Remuneration) has a value so Nature of Person must be "C" Director.	Select Edit...Employee Masterfile and access the employee in question. Select the Tax Tab. Select the Nature of Person option C.
Voluntary Additional Tax is selected on the Tax Tab of the Edit...Employee Masterfile screen but no value was processed against Tax Total 4102 (PAYE).	Select Edit...Employee Masterfile and access the employee in question. Select the Tax Tab. Deselect the Voluntary Additional Tax option.
Director's bonus transaction 5207 has been used, so the IT3(a) reason code on the Tax Tab, Employee Masterfile screen must be a 6.	Select Edit...Employee Masterfile and access the employee in question. Select the Tax Tab. Select the IT3(a) Reason Code option 6.
Tax totals 3605 has been checked, so 3695 and 3699 must also be checked.	Select Setup...Transactions . Select the transaction in question. Check which template code the transaction is linked to. Click the Cancel button. Go to Setup...Transaction Templates . Select the template the transaction is linked to. Click on Tax Totals. Select Tax Totals 3605, 3695 and 3699.
Tax totals 3695 has been checked, so 3605 and 3699 must also be checked.	Select Setup...Transactions . Select the transaction in question. Check which template code the transaction is linked to. Click the Cancel button. Select Setup...Transaction Templates . Select the template the transaction is linked to. Click on Tax Totals. Select Tax Totals 3605, 3695 and 3699.
Tax Total 4001 has been checked so Tax Total 4497 must also be checked.	Select Setup...Transactions . Select the transaction in question. Check which template code the transaction is linked to. Click the Cancel button. Select Setup...Transaction Templates . Select the template the transaction is linked to. Click on Tax Totals. Select Tax Total 4001 and 4497.

Tax Total 4002 has been checked so Tax Total 4497 must also be checked.

Select **Setup...Transactions**. Select the transaction in question. Check which template code the transaction is linked to. Click the Cancel button. Select **Setup...Transaction Templates**. Select the template the transaction is linked to. Click on Tax Totals. Select Tax Total 4493 and 4497.

For Council Companies Only

Tax Total 3833 must equal the
value of Tax total 4584

This exception occurs only on council companies. In the 2019 tax year, certain council contributions became taxable – therefore Quick Payroll created fringe benefits to align with this new legislation.

As each council is different, the resolution for each council is different. Please Find below your council's resolution guide for this exception:

3833 not Equal to 4584 – MIBFA

You are experiencing this exception because the Year to Date (YTD) of M103 is not equal to the YTD amount on the code M203.

Ensure that you are in February (for Year End) or August (for bi-annuals) in order to correct this exception, if you are not, please restore back to the applicable period.

Navigate to Process, Payslip.

On the default tab, enter the code M203 Code M203 will auto calculate to match the YTD total of code M103.

If after you have entered the code M203, and you are still experiencing the exception, please make a backup, and do a rebuild totals.

Note: Adding in the code M203 can have an effect on your PAYE, UIF & SDL – so please file for a correction if you have already done your monthly statutory payments and there are changes.

If your employee was terminated and your code M203 was either not processed, or don't match the YTD value of code M103, you will have 3 options to resolve this:

.

You can restore back to the last period this employee was still active, add in code R700. You will have to recapture all the information for the periods between the period you restored to and the period that you were in before restoring.

3833 not Equal to 4584 - MIBCO

MIBCO has two company contributions that are linked to Tax Total 3833, transaction I111 and I112. Therefore they have two fringe benefit codes that match each of the contribution codes, I300 (matches I111) and I301 (matches I112).

The reason you are getting this exception is due to the fact that one, or both of the fringe benefit codes values don't match the values on its company contribution.

Ensure that you are in February (for Year End) or August (for bi-annuals) in order to correct this exception, if you are not, please restore back to the applicable period.
Navigate to **Process, Payslip**.

On the default tab, enter the code **I300** (if you have processed the code I111) and/or **I301**.

The code **I300** does not auto calculate. You will have to do a corrective transaction:

1. In the current period, you will navigate to the Process, Payslip screen of the employee in question.
2. Click on the contributions tab and check the YTD for the code **I111**
3. Click on the benefits tab and check the YTD for the code **I300**
4. Calculate the difference between the two amounts
5. Click the **override** box for code I300 on the benefits tab
6. **Add** the difference that you calculated in step 3 to the amount already displayed on I300. After this the YTD totals of code I111 and I300 should be in balance.

Code **I301** will auto calculate to match the YTD total of code **I112**. If after you have entered the code M203, and you are still experiencing the exception, please make a backup, and do a rebuild totals.

Note: Adding in the code E214 can have an effect on your PAYE, UIF & SDL – so please file for a correction if you have already done your monthly statutory payments and there are changes.

If your employee was **terminated** and your code I300 and/or I301 was either not processed, or don't match the YTD value its company contribution, you will have 3 options to resolve this:

You can restore back to the last period this employee was still active, add in code R700. You will have to recapture all the information for the periods between the period you restored to and the period that you were in before restoring.

3833 not Equal to 4584 – Road Freight

You are experiencing this exception due to the fact that the Year to Date (YTD) sum value of R110, R111, R112, R118 is not equal to the YTD amount on the code **R700**.

Ensure that you are in February (for Year End) or August (for bi-annuals) in order to correct this exception, if you are not, please restore back to the applicable period.

1. Navigate to **Process, Payslip**.
2. On the default tab, enter the code **R700**

Code R700 will auto calculate to match the YTD totals of the sum of R110, R111, R112 and R118. If after you have entered the code R700, and you are still experiencing the exception, please make a backup, and do a rebuild totals.

If your employee was **terminated** and your code R700 was either not processed, or don't match the YTD values of the sum of R110, R111, R112 & R118, you will have 3 options to resolve this:

You can restore back to the last period this employee was still active, add in code R700. You will have to recapture all the information for the periods between the period you restored to and the period that you were in before restoring.
